2024/2025

WORLD CLASS ASSET RELIABILITY SOLUTIONS

OILWATCH is the South African Leader in Tribology, Fuel and Transformer laboratory Services. We are a state-of-the-art analytical laboratory that provides an effective and efficient service to the oil and fuel industry. We believe in a holistic approach to oil analysis. Unlike traditional tribology labs, our reports and feedback are concise, user friendly, and empower your staff in making more informed decisions. The basis of our philosophy is 'no compromise'.

OILWATCH Laboratories have been committed to asset condition monitoring through oil analysis since 2004. We have advanced laboratories located across the country, allowing us to have quick response times and excellent customer support services. We have a dedicated team of diagnosticians that have combined experience of over 150 years.

www.oilwatch.co.za

OILWATCH analysis reports are based in three aspect which is oil condition, equipment health (wear rates) and contamination detection. Using these factors as the main pillars of our analysis reports, our customers can easily narrow down on fault finding and condition-based maintenance practices.

"Protecting your most critical assets through condition monitoring"

WORLD CLASS ASSET RELIABILITY SOLUTIONS

What We Offer.

- Advanced lubricating oil analysis.
- Fuel testing and analysis.
- Coolant analysis.
- Transformer Oil analysis.
- Sampling Equipment.
- All levels of training related to condition monitoring.

ISO 9001 & 17025 Accredited Laboratories.

Our laboratories fulfil all the requirements of the 9001 and 17025 requirements.

Fuel Analysis SANS 342 Testing.

Monitor fuel quality and detect contaminations. We have a wide test regime according to SANS 342 specifications, from paraffin contamination, to distillation profiles, to fuel cleanliness.

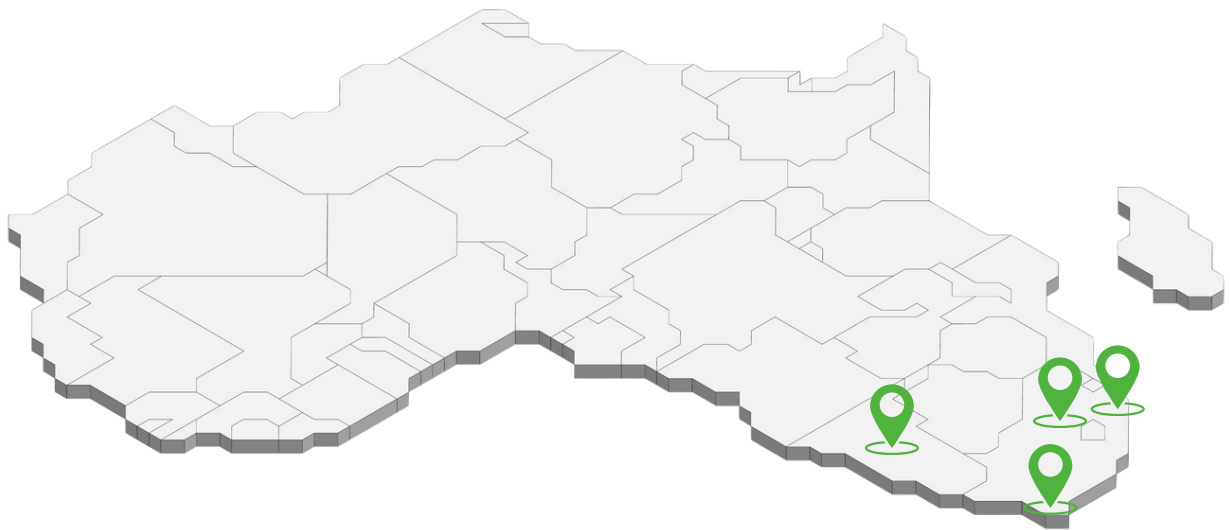

Oil Analysis Proactive Monitoring.

Detect problems before they become failures. Increase your equipment reliability and extend equipment life with a well managed oil analysis program.

We focus on a wide array of industries (mobile equipment, industrial, mining and marine).
